## Final Unified Reasoning

- Detailed Reasoning:

The evidence strongly supports the claim that Sukanta Majumdar was detained. The web search (Evidence 3) provides a high support score of 20.0, indicating strong corroboration of the claim across multiple news sources. This is the most significant piece of evidence, and its high score heavily influences the final classification.

Evidence 2 (Image-Image Consistency) further reinforces this conclusion. The two images depict a consistent narrative: the initial apprehension and subsequent transport of the individual by police. The presence of "KOLKATA POLICE" in both images adds to the credibility. The sentiment and entities are also aligned across both images, suggesting they are part of the same event.

Finally, Evidence 1 (Image-Text Consistency) provides minor but supportive cues. The image aligns with the text's description of a tense situation with police presence and a crowd, and the man's expression in the image matches the text's implication of detention.

- Arguments FOR the classification:

- **Strong Web Support:** The high support score from the web search is the most compelling evidence.

- **Consistent Visual Narrative:** The two images depict a logical sequence of events consistent with detention.

- **Alignment of Image and Text:** The image and text descriptions are mutually reinforcing.

- Arguments AGAINST the classification:

- There is no direct visual confirmation of "Beldanga" in either image, although the text mentions it as the destination. However, this is a minor point as the core claim of detention is supported by other evidence.

Given the overwhelming support from the web search and the consistent visual and textual cues, the final classification is REAL with a **High** confidence level.
