## Query News Sample

"Pushpa 2 Fans Blasts Firecrackers in Theatre, This is totally Insane"

## Top Visual Evidence

"Pushpa 2 Fans Create Chaos At Cinemas: Fireworks, Arguments, and Stampede Erupt In Bengaluru & Hyderabad - VIRAL VIDEO"

# Fake News Analysis Report

Query ID: 51

## Final Unified Reasoning

- Detailed Reasoning:

The final classification is FAKE, primarily driven by the low support score (-20.0) from the web search claim verification (Evidence 3). This indicates a significant lack of corroborating evidence from reputable news sources to support the claim that fans blasted firecrackers in theaters during the "Pushpa 2" show. While the image-text analysis (Evidence 1) initially suggested a truthful representation due to the alignment of sentiment, entities, and event/action, this is outweighed by the lack of external verification. The image-image analysis (Evidence 2) further supports this conclusion. While the images are consistent in depicting the event of firecrackers being used during a "Pushpa 2" screening, the sentiment mismatch – the query image expressing outrage while the evidence image is more observational – suggests the query image might be a reaction to a different, potentially isolated incident, or even a staged/exaggerated portrayal.

- Arguments FOR FAKE classification:

- **Strongest Argument:** The web search claim verification (Evidence 3) provides a strong negative signal, indicating a lack of credible news reports supporting the claim. This is the most significant factor in the decision.

- The sentiment mismatch between the two images (Evidence 2) raises concerns about the query image's authenticity and whether it accurately represents a widespread phenomenon.

- Arguments AGAINST FAKE classification:

- The initial image-text analysis (Evidence 1) showed alignment between the image and text, suggesting a plausible scenario.

- The image-image analysis (Evidence 2) confirmed the presence of the core event (firecrackers during the movie).

Given the strong negative signal from the web search and the concerns raised by the sentiment mismatch, the overall assessment leans towards the claim being FAKE.

- Confidence Level: High

## Image vs. Text Analysis (Query)

Okay, let's break down this news sample with the 4-step analysis.

### STEP 1: Sentiment Alignment

**1. Text Sentiment:** The text expresses strong negative sentiment - "Insane," "Blasts," "totally Insane" - indicating shock, disapproval, and possibly anger. The use of multiple crying/shocked emojis reinforces this.

**2. Image Sentiment:** The image shows a chaotic scene with firecrackers exploding in a theater. The bright flashes, smoke, and general disarray evoke a sense of excitement, but also potential danger and disruption. The emojis in the image also convey shock and excitement.

**3. Comparison:**

- Classification: Sentiment Aligned
- Reasoning: While the image has elements of excitement, the overall chaotic and disruptive nature aligns with the negative and shocked sentiment expressed in the text. Both convey a sense of something unexpected and intense.

### STEP 2: Entity Consistency

**1. Text Entities:** The text mentions "Pushpa 2" (movie title), "Fans" (group of people), and "Theatre" (location).

**2. Image Entities:** The image clearly depicts a theater setting (visible seating and screen). It's reasonable to infer the presence of "Fans" given the context of a movie showing. "Pushpa 2" is referenced in the hashtags.

**3. Comparison:**

- Classification: Entities Aligned
- Reasoning: All the key entities mentioned in the text are visually represented or strongly implied in the image.

### STEP 3: Event/Action Consistency

**1. Text Event/Action:** The text describes fans blasting firecrackers in a theater during a "Pushpa 2" show.

**2. Image Depiction:** The image directly depicts the event described - firecrackers exploding within a theater.

**3. Comparison:**

- Classification: Event/Action Aligned

# Fake News Analysis Report

Query ID: 51

---

- Reasoning: The image provides a visual representation of the core event described in the text: firecrackers being used in a theater during a movie showing.

---

## STEP 4: Final Judgment

- Judgment: TRUE

- Brief Reasoning: All three analyses (Sentiment Alignment, Entity Consistency, and Event/Action Consistency) strongly support the pairing of the image and text. The sentiment, entities, and event described in the text are all visually represented and consistent with the image. Therefore, the image and text appear to be a truthful representation of the event.

Query ID: 51

## Query Image vs. Evidence Image Analysis

Okay, let's analyze the two images step-by-step.

- STEP 1: Sentiment Alignment

• **Image 1 Sentiment:** The query image conveys a strong negative sentiment. The text "THIS IS INSANE" and the use of multiple angry/shocked emojis (😡😡😡) clearly indicate distress and disapproval. The firecracker emojis add to the chaotic and alarming feeling.

• **Image 2 Sentiment:** The evidence image shows a movie screen with what appears to be a scene from the film "Pushpa 2" and some fireworks. The lighting is dim, and the scene is chaotic, but the overall sentiment is less overtly negative than Image 1. It's more observational, capturing a moment of excitement (albeit potentially disruptive).

- **Comparison:** Sentiment Mismatch

• **Reasoning:** Image 1 expresses strong negative emotion and outrage, while Image 2 depicts the event itself without the same level of emotional intensity.

- STEP 2: Entity Consistency

- **Entities in Image 1:** "Pushpa 2", "Firecrackers", "Theatre"

• **Entities in Image 2:** "Pushpa 2" (movie scene visible on screen), "Firecrackers" (visible in the scene), "Theatre" (implied by the screen and setting).

- **Comparison:** Entities Aligned

• **Reasoning:** Both images explicitly mention and visually depict "Pushpa 2" and the presence of firecrackers in a theatre setting.

- STEP 3: Event/Action Consistency

• **Event/Action in Image 1:** The query image depicts a reaction to the event of people setting off firecrackers during a "Pushpa 2" movie screening, expressing shock and disapproval.

• **Event/Action in Image 2:** The evidence image shows the event itself: people setting off firecrackers during a "Pushpa 2" movie screening.

- **Comparison:** Event/Action Aligned

• **Reasoning:** Both images relate to the same event – the use of firecrackers during a movie screening of "Pushpa 2". Image 1 shows the reaction, and Image 2 shows the action.

- STEP 4: Final Judgment

- **Judgment:** TRUE

• **Brief Reasoning:** While the sentiment is mismatched (Image 1 is negative, Image 2 is more neutral), the entities and the event/action are aligned. The query image is expressing a reaction to the event shown in the evidence image. The images together support the claim that people were setting off firecrackers during a "Pushpa 2" movie screening. The sentiment mismatch doesn't invalidate the factual claim.

Query ID: 51

## Text vs. Text Factual Consistency Analysis

### Evidence Snippet #1

**Factual Score:** 1

**Rationale:** Both sentences describe the same event: fans of the movie 'Pushpa 2' causing chaos and using firecrackers in theaters. Sentence B provides more detail (fireworks, arguments, stampede, locations of Bengaluru & Hyderabad) but the core factual claim of fans causing disruption is present in both.

### Evidence Snippet #2

**Factual Score:** -1

**Rationale:** Sentence B is from YouTube, which hosts fact-checking content. The title of the video explicitly states it is a fact-check regarding a viral video showing fireworks inside a theatre during a 'Pushpa 2' screening. This directly addresses and debunks the claim made in Sentence A.

### Evidence Snippet #3

**Factual Score:** 1

**Rationale:** Both sentences describe the same event: fans celebrating the screening of 'Pushpa 2' by using firecrackers/bonfire in a theatre in Bengaluru. Sentence A mentions 'firecrackers' and Sentence B mentions 'bonfire,' both indicating celebratory actions related to the movie screening.

### Evidence Snippet #4

**Factual Score:** -1

**Rationale:** Sentence A claims a firecracker incident occurred during a 'Pushpa 2' screening. Sentence B, from the fact-checking website Factly, explicitly states that a video of a firecracker incident at a 'Tiger 3' screening is falsely being shared as related to 'Pushpa 2'. This directly debunks the claim in Sentence A.

# Fake News Analysis Report

Query ID: 51

## Text vs. Text Analysis (cont.)

### Evidence Snippet #5

**Factual Score:** -1

**Rationale:** Sentence A claims that fans blasted firecrackers at a Pushpa 2 screening. Sentence B, from the fact-checking website Factly, explicitly states that this incident is a false claim, falsely attributed to a screening of Vijay's Goat movie, and is actually an old incident from a Tiger 3 screening. Therefore, Sentence B debunks the claim in Sentence A.

### Evidence Snippet #6

**Factual Score:** 1

**Rationale:** Both sentences describe the same event: fans celebrating the movie 'Pushpa 2' by bursting firecrackers in a theater in Bengaluru. Sentence A states 'Fans Blasts Firecrackers in Theatre,' and Sentence B confirms this with 'Fans Burst Crackers On Stage' during the screening. The location (Bengaluru) and the context (movie screening) are identical.

### Evidence Snippet #7

**Factual Score:** 0

**Rationale:** Sentence A describes fans celebrating the movie 'Pushpa 2' by blasting firecrackers in a theatre, suggesting chaotic and disruptive behavior. Sentence B reports fans saying 'Finally sab theek ho gaya' (everything is alright), which is a general expression of satisfaction and doesn't directly relate to the specific event of firecrackers being used in a theatre. They are different events, even if related to the same movie.

### Evidence Snippet #8

**Factual Score:** 0

**Rationale:** Sentence A describes fans celebrating the movie 'Pushpa 2' by setting off firecrackers in a theatre. Sentence B describes a case of mistaken identity where the 'Pushpa 2' trailer launch was confused with a political meeting. These are two distinct events and do not describe the same real-world situation.

# Fake News Analysis Report

Query ID: 51

## Text vs. Text Analysis (cont.)

### Evidence Snippet #9

**Factual Score:** 0

**Rationale:** Sentence A describes fans celebrating the movie 'Pushpa 2' by setting off firecrackers in a theatre, suggesting chaotic and extreme behavior. Sentence B is a description of an explanation of the 'Pushpa 2 Reloaded' version. They refer to different aspects of the same movie but do not describe the same event or situation. Therefore, they do not convey the same factual information.

### Evidence Snippet #10

**Factual Score:** 0

**Rationale:** Sentence A describes fans celebrating a movie (Pushpa 2) by setting off firecrackers in a theatre. Sentence B describes an unrelated incident of violence against Muslims in India. These are different events and do not share any factual overlap.
