## VERDICT: FAKE NEWS

### Query News Sample

"Radical Muslims are openly trying to kill Hindu women!!"

### Top Visual Evidence

"Beaten and humiliated by Hindu mobs for being a Muslim in India"

# Fake News Analysis Report

Query ID: 13

## Final Unified Reasoning

- Detailed Reasoning:

The evidence overwhelmingly points to the news post being fake. The strongest indicator is **Evidence 3 (Web Search)**, which assigns a "LIKELY FAKE" classification with a low support score of 0.0. This means that a web search of the claim and related keywords found no credible sources supporting the assertion that "Radical Muslims are openly trying to kill Hindu women." This is a critical piece of evidence, as it directly assesses the factual basis of the claim.

- Evidence 1 (Image-Text Consistency) further reinforces this conclusion. The text's highly charged and violent language clashes dramatically with the image, which depicts a seemingly ordinary interaction between two men and a woman. There's no visual evidence of any threat or violence, creating a significant "Event/Action Mismatch." The text also makes unverifiable claims about religious identities, which cannot be confirmed from the image.

- Evidence 2 (Image-Image Consistency), while less directly related to the text, adds another layer of doubt. The comparison with a retrieved image of a protest reveals a complete mismatch in sentiment, entities, and events. This suggests the original image is being used out of context, potentially to mislead or incite.

- Arguments FOR the FAKE classification:

- Strong Web Search Result:** The web search provides a definitive indication that the claim is unsupported by credible sources.

- Significant Mismatches:** Both Image-Text and Image-Image analyses reveal substantial inconsistencies, suggesting manipulation or misrepresentation.

- Lack of Visual Evidence:** The image itself does not depict the violent event described in the text.

- Arguments AGAINST the FAKE classification:

- There is no direct evidence proving the image was taken out of context or manipulated. However, the lack of supporting evidence and the inconsistencies with the text are highly suggestive.

Given the strong negative findings from the web search and the clear inconsistencies across all three evidence types, the final classification is FAKE with **High** confidence.

## Image vs. Text Analysis (Query)

Okay, let's analyze the provided news sample step-by-step.

### STEP 1: Sentiment Alignment

**1. Text Sentiment:** The text expresses extreme negative sentiment, characterized by anger, fear, and accusation. The phrases "Radical Muslims" and "trying to kill" convey a highly charged and alarming tone.

**2. Image Sentiment:** The image depicts two men standing in a muddy area, seemingly engaged in a conversation. One is shirtless and the other is wearing shorts. A woman in a sari is visible in the background. The overall scene appears relatively calm and doesn't inherently convey a sense of violence or threat.

**3. Comparison:**

- Classification: Sentiment Mismatch
- Reasoning: The text is highly charged with negative emotion and accusations of violence, while the image shows a seemingly ordinary interaction with no visible signs of aggression or danger.

### STEP 2: Entity Consistency

**1. Text Entities:** The text mentions "Radical Muslims" and "Hindu women."

**2. Image Entities:** It's impossible to definitively determine the religious affiliation of the individuals in the image based solely on their appearance. The woman's sari could suggest a South Asian background, but it doesn't confirm she is Hindu. The men's appearances don't indicate religious affiliation.

**3. Comparison:**

- Classification: Entities Ambiguous/Unverifiable
- Reasoning: The text makes specific claims about religious identities ("Radical Muslims," "Hindu women") that cannot be verified or refuted based on the visual information in the image.

### STEP 3: Event/Action Consistency

**1. Text Event/Action:** The text describes an attempt to kill Hindu women by radical Muslims. This implies a violent and dangerous event.

**2. Image Depiction:** The image shows two men and a woman seemingly engaged in a conversation. There is no visible indication of any violent action or threat.

**3. Comparison:**

- Classification: Event/Action Mismatch
- Reasoning: The text describes a violent event (attempted murder), while the image depicts a calm

# Fake News Analysis Report

Query ID: 13

---

interaction. There is no visual evidence to support the claim of an attack or threat.

---

## STEP 4: Final Judgment

- Judgment: FAKE
- Brief Reasoning: The combination of Sentiment Mismatch , Entities Ambiguous/Unverifiable , and especially Event/Action Mismatch strongly suggests that the image and text are not consistent. The text makes serious accusations of violence that are not supported by the visual content of the image. The image does not depict the event described in the text, and the claims about religious identities are not verifiable. This pairing appears to be a deliberate attempt to misrepresent the image and incite fear or hatred.

## Query Image vs. Evidence Image Analysis

Okay, let's analyze the two images step-by-step.

- STEP 1: Sentiment Alignment

**1. Image 1 Sentiment:** The image shows two men in a muddy area, seemingly engaged in a physical altercation or struggle. The expressions on their faces appear tense and potentially angry. The overall sentiment is negative, likely reflecting conflict or distress.

**2. Image 2 Sentiment:** The image depicts a protest with signs reading "All Lives Matter" and "Black Lives Matter." The person in the foreground has a serious expression. The sentiment is complex, potentially reflecting a mix of frustration, determination, and possibly disagreement.

**3. Comparison:**

- Classification: Sentiment Mismatch
- Reasoning: Image 1 conveys a negative sentiment of conflict, while Image 2 conveys a more complex sentiment related to social justice and protest, which is less directly negative.

- STEP 2: Entity Consistency

**1. Entities in Image 1:** The primary entities are two men, and the location appears to be a muddy, natural area.

**2. Entities in Image 2:** The entities are protesters, signs with slogans, and a person wearing a traditional Islamic head covering.

**3. Comparison:**

- Classification: Entities Mismatch
- Reasoning: There is no overlap in the entities depicted in the two images. The people, locations, and objects are entirely different.

- STEP 3: Event/Action Consistency

**1. Event/Action in Image 1:** The main event is a physical confrontation or struggle between two men in a natural setting.

**2. Event/Action in Image 2:** The event is a protest or demonstration related to the "All Lives Matter" and "Black Lives Matter" movements.

**3. Comparison:**

- Classification: Event/Action Mismatch
- Reasoning: The images depict entirely different events. One shows a physical altercation, and the other shows a peaceful protest.

- STEP 4: Final Judgment

- Judgment: FAKE

- Brief Reasoning: All three analyses (Sentiment, Entities, and Event/Action) indicate a significant mismatch between the two images. The images depict completely different scenarios with different

Query ID: 13

---

people, locations, and emotional tones. This strongly suggests the pairing is misleading or manipulated, likely intended to create a false association between a physical altercation and a social justice movement.

Query ID: 13

## Text vs. Text Factual Consistency Analysis

### Evidence Snippet #1

**Factual Score:** 0

**Rationale:** Sentence A claims radical Muslims are trying to kill Hindu women. Sentence B describes Hindu mobs attacking and humiliating Muslims. These are different events and do not describe the same real-world situation. They present opposing narratives of violence.

### Evidence Snippet #2

**Factual Score:** 0

**Rationale:** Sentence A claims radical Muslims are trying to kill Hindu women, while Sentence B states Hindu extremists are targeting Muslims. These are distinct claims about different groups and actions, referring to different events. They do not describe the same real-world situation.

### Evidence Snippet #3

**Factual Score:** 0

**Rationale:** Sentence A makes a claim about radical Muslims attempting to harm Hindu women. Sentence B discusses population control in India. These are unrelated topics and do not describe the same real-world situation.

### Evidence Snippet #4

**Factual Score:** 0

**Rationale:** Sentence A makes a highly inflammatory and unsubstantiated claim about radical Muslims attempting to kill Hindu women. Sentence B refers to a concept called 'Love Jihad,' which is a right-wing conspiracy theory alleging that Muslim men target Hindu women for conversion to Islam through marriage. These are different topics and do not describe the same real-world situation. Sentence B does not address or debunk the claim made in Sentence A.

# Fake News Analysis Report

Query ID: 13

## Text vs. Text Analysis (cont.)

### Evidence Snippet #5

**Factual Score:** 0

**Rationale:** Sentence A makes a serious claim about radical Muslims attempting to kill Hindu women. Sentence B is an opinion piece from The Wire discussing the issue of spitting in public spaces in India. The two sentences address entirely different topics and do not share any factual alignment.

### Evidence Snippet #6

**Factual Score:** 0

**Rationale:** Sentence A makes a highly inflammatory and specific claim about radical Muslims attempting to kill Hindu women. Sentence B is a link to a report titled 'Violence Against Muslims in India.' These are different topics; one alleges violence *\*against\** Hindus, while the other discusses violence *\*against\** Muslims. They do not describe the same real-world situation.

### Evidence Snippet #7

**Factual Score:** 0

**Rationale:** Sentence A makes a claim about radical Muslims attempting to harm Hindu women. Sentence B discusses how Hindu nationalists are using history against Muslims. These are distinct topics and do not describe the same real-world situation. There is no overlap in the factual claims.

### Evidence Snippet #8

**Factual Score:** 0

**Rationale:** Sentence A makes a highly inflammatory claim about radical Muslims attempting to kill Hindu women. Sentence B poses a question about the persecution of Muslims in India. These are different topics and do not describe the same real-world situation. Sentence B does not address or refute the claim in Sentence A.

# Fake News Analysis Report

Query ID: 13

## Text vs. Text Analysis (cont.)

### Evidence Snippet #9

**Factual Score:** 0

**Rationale:** Sentence A makes a claim about radical Muslims attempting to harm Hindu women. Sentence B discusses the persecution of Muslims in India. These are distinct topics and do not describe the same real-world situation.

### Evidence Snippet #10

**Factual Score:** 0

**Rationale:** Sentence A makes a serious claim about radical Muslims attempting to kill Hindu women. Sentence B simply states that the BJP is responding to something. These are different facts; one is an accusation of violence, and the other is a political reaction. There is no factual overlap.
